00:00:35 Speaker 2

Hello, welcome once more to our continuation of a discussion with Doctor Frederick C Elliott.

00:00:45 Speaker 2

Formerly Dean and Vice president of the University of Texas Dental branch of Houston.

00:00:50 Speaker 2

Also director of the Texas Medical Center for some 10 years.

00:00:55 Speaker 2

And it's just that decade that we're going to discuss now in Part 4 of this series.

00:01:00 Speaker 2

The year is.

00:01:01 Speaker 2

From around 1952 until 1960.

00:01:04 Speaker 2

2 or 63.

00:01:06 Speaker 2

Not too early after, as we concluded, we had discussed with you somewhat the momentous decision you had to make.

00:01:13 Speaker 2

This probably one of the most important ones.

00:01:16 Speaker 2

In your life.

00:01:17 Speaker 2

To leave the dental school you're alive of some 20 years here in.

00:01:21 Speaker 2

Houston, at least.

00:01:22 Speaker 2

And to take over the directorship of the.

00:01:24 Speaker 2

Texas Medical Center.

00:01:26 Speaker 2

And I think you have said that it was a rather comfortable decision after you had thought about it and discussed it, filled with Mrs Elliott than others.

00:01:34 Speaker 2

And that you felt that you had a faculty of good people, that you had a unified institution and that they had been in on the planning of that institution and its construction and we're ready to go.

00:01:46 Speaker 2

Now to introduce a new element into our program this morning, I think it's unique, for instance, that we have here an addition of the Texas Medical Center News published in October 1952. And in the left hand column there is a headline that says Doctor Elliott, appointed Executive director of the Medical Center.

00:02:05 Speaker 2

And in the column accompanying that is a rather interesting 1 Olson and Olson named Medical and dental school Deans.

00:02:15 Speaker 2

It's unique that.

00:02:16 Speaker 2

Would come across this some 21 years later, but the Olson and Olson thing, of course, you know quite well. One has to do with Doctor Stanley Nelson and the other with Doctor John Vick. Trolls.

00:02:28 Speaker 2

Doctor Stanley Ellison, as I understand it, replaced Doctor Morse and as Dean of Baylor College of Medicine, correct?

00:02:35 Speaker 3

Yes, yes.

00:02:38 Speaker 3

Find an appointment as the assistant Director Male clinics at the Mayo Foundation in Rochester, MN.

00:02:47 Speaker 3

He was a very capable person and had the specific experience and medical education through the University of Minnesota and it's Graduate School.

00:02:57 Speaker 3

Doctor Victor Allison also claimed that the Dallas field had been exposed for quite some time and better education at the Saint Louis University College of Dentistry, and was reluctant to leave there.

00:03:10 Speaker 3

And I first.

00:03:11 Speaker 3

Talked within a year.

00:03:11 Speaker 3

Before that, they finally decided to come because he felt possibly.

00:03:17 Speaker 3

There was the opportunity that I had explained in that time.

00:03:20 Speaker 2

He became immediately involved in administrative.

00:03:24 Speaker 3

Oh no, he was wrong, but.

00:03:25 Speaker 3

He know he thought that he came.

00:03:27 Speaker 3

Perfect purpose as the faster or better prosthesis and the.

00:03:32 Speaker 3

Please share about design is another reason for such that the Saturday and I decided that it would be a good person to share the coordinator of clinical affairs which she.

00:03:44 Speaker 3

Did quite well.

00:03:45 Speaker 3

Hello, and I nominate them, along with others, to the as fast as the university, for consideration by a committee as exactly which he appointed.

00:03:58 Speaker 3

Doctor Elson was selected.

00:04:01 Speaker 2

I think you've mentioned that they had a nice easygoing.

00:04:05 Speaker 2

I think over the years that easygoing manner has not to say that he isn't alert and right on the ball because we know he is preferred ability to get along with people has proven itself time and time again in Doctor Olsen career.

00:04:21 Speaker 3

Yes, I think it took better better that he was selected by the federal agents at the university to serve as acting director.

00:04:29 Speaker 3

As all of the university elements there are institutions interesting.

00:04:34 Speaker 2

Now call the University of Texas.

00:04:35 Speaker 2

Health Science Center at Houston.

00:04:38 Speaker 2

Back to 195253. That's era.

00:04:43 Speaker 2

Later was here, MD Anderson was coming, being constructed the dental school Methodist salon, but also there was a building that later was to house your office.

00:04:54 Speaker 2

The Jesse Jones Library building was just beginning to get underway.

00:04:59 Speaker 2

Obviously that must have come about with assistance.

00:05:02 Speaker 2

From Mr. Jones himself.

00:05:04 Speaker 3

Yes, Sir.

00:05:05 Speaker 3

Mr Charles is quite the substantial contributor.

00:05:09 Speaker 3

To that building.

00:05:10 Speaker 3

It was a project of the Academy of Medicine at Houston and they had had a library for many years, but it was located in quarters downtown and the.

00:05:22 Speaker 3

Medical arts building.

00:05:24 Speaker 3

As a Medical Center, comical all they wanted a central facility and has a library in a Medical Center and close to a medical school.

00:05:33 Speaker 3

So there was a live show affect the active work.

00:05:36 Speaker 3

The radius or library.

00:05:39 Speaker 3

And the Medical Center?

00:05:41 Speaker 2

Now I understand there was a medical library at.

00:05:44 Speaker 2

Bader at the time, too.

00:05:46 Speaker 3

Yes, Mayor had brought their life there with the medical library from Dallas and they moved to Houston and the conversation forgot immediately between the officers and they had cavalier medicine.

00:05:59 Speaker 3

Library and the Baylor University College of Medicine that commented on the joint arrangements so far.

00:06:08 Speaker 3

The library could be served then.

00:06:10 Speaker 3

Then that got this to specify a Central Library, all of these substitutions for the medical.

00:06:17 Speaker 2

Center another interesting institution.

00:06:20 Speaker 2

It came into being about that time and has imbued itself to many people in Houston and to my personalized knowledge to many.

00:06:27 Speaker 2

People across this country.

00:06:29 Speaker 2

For the Houston speech and Hearing center, I believe its first home was in the lower level as we say are really the basement of Methodist Hospital.

00:06:38 Speaker 3

That's yeah.

00:06:39 Speaker 3

The asset was a dream of Doctor Charles Dixon and he had been a family member of the Saturday.

00:06:48 Speaker 3

The better bet should I live in quite well with Professor bacteriology there, and he had some methods that so many children that he responded to.

00:07:02 Speaker 3

Develop the speech and hearing center.

00:07:05 Speaker 3

He was responsible as a brilliant doctor, Jack buying share to serve as its first director Doctor.

00:07:13 Speaker 3

Well, yes, she.

00:07:18 Speaker 3

Became one of his assistants and they are the true develop the speech and hearing center underwater hills today.

00:07:25 Speaker 2

After Tina Bangs, US toilets active director and there's a very energetic and effective job with that institution.

00:07:33 Speaker 2

At that time the.

00:07:34 Speaker 2

University of Texas Post Graduate School of Medicine.

00:07:38 Speaker 2

Our medical school was coming into being to.

00:07:42 Speaker 2

Do you have memories of that?

00:07:43 Speaker 2

Not really.

00:07:44 Speaker 3

Yes, since the devil still had the.

00:07:46 Speaker 3

Early start program for practicing dentists and we felt that feature, as I said earlier, that we ought to have a program for all phases of health service.

00:08:00 Speaker 3

So the postgraduate School of Medicine became a part of the university purposes.

00:08:06 Speaker 3

Program and grew out there.

00:08:09 Speaker 3

We first talked about a preceptor training center.

00:08:13 Speaker 3

Such great to have bad management and the teaching Western background by Houston physicians.

00:08:21 Speaker 3

By the surviving but however, we will never be able to develop the program for shocking that Taylor Dancer as a teacher.

00:08:29 Speaker 3

As you know, he was formerly the associate Dean at this University School of Medicine.

00:08:35 Speaker 2

Also when he came to Houston was with MD Anderson as a pediatrician and as.

00:08:42 Speaker 2

Head of department.

00:08:43 Speaker 2

Of Pediatrics and devoted much of his time, though, and still does, to the continuing education of physicians.

00:08:51 Speaker 2

A very nice and helpful man.

00:08:54 Speaker 2

In your records shows that between years in 1952 and 1963 you were an advisory member of the Board of Managers of Jefferson Davis Hospital.

00:09:07 Speaker 3

So they asked me to share this advisory member because at that time we had been discussing for quite.

00:09:14

A long.

00:09:14 Speaker 3

While the idea of the City County Hospital being located there Medical Center, so our discussion centered around as hospital preparation.

00:09:25 Speaker 3

Is being made.

00:09:26 Speaker 3

Many years before for building a hospital.

00:09:28 Speaker 1

At the time the.

00:09:29 Speaker 3

Preparation made made regarding the Medical Center idea without developed at that time, but that was the reason why I was on the floor to help that more than making its plans for and moving through the Medical Center.

00:09:44 Speaker 2

Your old school up in Kansas City, which has now become the University of Kansas City at dental school, decided in 1953 to honor you and it shows you. The Alumni Association shows you as man of the year. Is there some memory there that the?

00:10:03 Speaker 3

Yes, the that the choices made by the grants undergraduate should they believe something to bring order to their school.

00:10:13 Speaker 3

I believe in addition to that I was chosen because I had been a founding member of.

00:10:22 Speaker 3

I need.

00:10:22 Speaker 3

We are not life situation.

00:10:25 Speaker 3

I have both first President, so I think that that is something we should try.

00:10:30 Speaker 3

Set it fast.

00:10:31 Speaker 2

Did you go back to Kansas City and visit?

00:10:33 Speaker 2

On that occasion.

00:10:35 Speaker 3

Perfectly, but not as often as.

00:10:37 Speaker 3

I had lied.

00:10:38 Speaker 2

On that particular occasion there, were you able to get the Kansas City Chiefs?

00:10:41 Speaker 3

Oh yes, I was there ever since the thread.

00:10:45 Speaker 2

So there must have been some change between 019181929 in there and.

00:10:52 Speaker 2

1953.

00:10:54 Speaker 3

Second, as we discussed before the Kansas City Business College and the Western benefactor First outstanding schools, they had become a part of the combined program at the University of Kansas City, but of course now is the University of Missouri at Kansas City.

00:11:11 Speaker 2

Yes, getting back to dental schools, I know in that early part of your tenure with Texas Medical Center, you were still much interested in the University of Texas Dental branch because it was under construction.

00:11:23 Speaker 2

There was something that you had participated in and directed very closely for a number of years, its planning.

00:11:28 Speaker 2

It was coming into fruition in a physical kind of way because it was coming out of the ground.

00:11:35 Speaker 2

Would you like?

00:11:35 Speaker 2

I know when I've built a home I have to walk through it from the time they started.

00:11:40 Speaker 2

Stake it out, you know, until the day it's finished and.

00:11:43 Speaker 2

I see all those little things I.

00:11:44 Speaker 2

Had dreamed about this, that never.

00:11:46 Speaker 2

Did you do that with the?

00:11:47 Speaker 3

Dental school, yes, quite awful lot, especially around my office had.

00:11:52 Speaker 3

Been moved over to the Medical Center.

00:11:54 Speaker 3

I'm done.

00:11:56 Speaker 3

I think the reason for that was that.

00:11:58 Speaker 3

I was quite.

00:11:58 Speaker 3

Fascinated with how the building was coming along.

00:12:01 Speaker 3

And how well?

00:12:02 Speaker 3

It too suffered already in the store was bringing it along.

00:12:07 Speaker 3

I wonder, when I was there, happen to talk with the Clerk of the works.

00:12:10 Speaker 3

I looked the part and found that the entrance to the boardroom at the leaves office had been admitted.

00:12:18 Speaker 3

I pointed that out to the Clerk of the works.

00:12:21 Speaker 3

He felt that I had made a mistake, that he goes back to the fans and found that they had what they were the ones that had left the bear out, so they had they left out a couple who had draft and leaves affected him.

00:12:32 Speaker 2

Doctor also might have had trouble having a meeting.

00:12:34 Speaker 2

That their meetings are important, I no clue.

00:12:37 Speaker 2

That there were plans from.

00:12:39 Speaker 2

The outset in the concept of the dental branch for television, which is widely used in the dental branch today, as it is in or most of the institutions here.

00:12:47 Speaker 2

In the medical.

00:12:48 Speaker 2

But in those days, television was brand new and.

00:12:52 Speaker 2

It wasn't thought of too much in the way of.

00:12:54 Speaker 2

Education in a science setting.

00:12:57 Speaker 2

Did you have anything to do with the?

00:12:59 Speaker 2

Ideas about that?

00:12:59 Speaker 3

Television, well, of course that was developed very early.

00:13:04 Speaker 3

In our thinking.

00:13:05 Speaker 3

Because we had filed by some of the.

00:13:07 Speaker 3

Work that we've.

00:13:07 Speaker 3

Done in audio visual education that moving pictures for election, medium for education.

00:13:16 Speaker 3

We thought that.

00:13:17 Speaker 3

Otherwise, comma land will be far better than movies because it could be large picture so the building was short form or celebration throughout the entire building.

00:13:29 Speaker 3

Because of this complications, we had the engineers of RCA Campbell Houston and go over the whole plan with the architects.

00:13:38 Speaker 3

They were responsible for solidly clouds cables system.

00:13:43 Speaker 2

And I know some of the television learning facilities in the battle branch have been observed by visitors from far and wide around the world and they get better and more innovative everyday, including this day and age.

00:14:00 Speaker 2

The third dimension capability of that television system.

00:14:03 Speaker 2

Most unique, the only one in the world that I know of.

00:14:05 Speaker 2

Second, let's roll abroad from the Texas Medical Center. I know you had other interests and other duties around the state, for example in 1954 in the mid 50s.

00:14:19 Speaker 2

Governor Allan Shivers, I believe, made you chairman of the governor's committee to serve a mental health training and research in the state of Texas. This seems to be like a sizable assignment.

00:14:32 Speaker 3

Second issue, well know during that era, mental health disorder, very low levels and stuff like that treatment and our state hospitals, not just in Texas but throughout the United States.

00:14:47 Speaker 3

They've been considered a discussion at national meetings concerning this deplorable situation.

00:14:53 Speaker 3

And the governor is another person.

00:14:56 Speaker 3

As you all know, the Governor Shepherds is an outstanding example and what good government should be here?

00:15:06 Speaker 3

Point forward.

00:15:09 Speaker 3

Problem still mental health and their treatment required discovery of the party chairman was aided by a group of outstanding teachers.

00:15:21 Speaker 3

Letter as in Texas.

00:15:24 Speaker 2

From that, I believe, ultimately came an institution.

00:15:27 Speaker 2

Here in the Texas Medical Center.

00:15:29 Speaker 3

That's one of.

00:15:30 Speaker 3

Our recommendations included a research facility.

00:15:34 Speaker 3

We felt that there was not a lot of work being done in studying why people have mental difficulties, so we recommended.

00:15:42 Speaker 3

An absolute cut for research and graduate education.

00:15:48 Speaker 3

And also recommended other facilities and it's freezing below it.

00:15:52 Speaker 3

Almost all of those recommendations turn into being the institution character was established in the Medical Center here and also around the state.

00:16:01 Speaker 3

We have daycare centers and other types of mental health facilities within about because of governor.

00:16:07 Speaker 3

Shivers. Foresight.

00:16:10 Speaker 2

Now, you had local interest, too, but beyond the Medical Center.

00:16:14 Speaker 2

For example, you were a member of the Metropolitan Area Committee of the Houston Chamber of Commerce for a number of years.

00:16:21 Speaker 2

What was the purpose of that committee?

00:16:24 Speaker 3

The second idea was to try to establish a central government of county and surrounding cities.

00:16:32 Speaker 3

Just a little side that's populations and fall City is actually strong, large cities.

00:16:38 Speaker 3

The idea was that they would all be pulled together under one such form of government that was prompted by the Chamber Congress, she said.

00:16:48 Speaker 3

But those are facts.

00:16:48 Speaker 3

That idea is still being discussed.

00:16:51 Speaker 3

And of course.

00:16:54 Speaker 3

They had some opposition to that particular idea.

00:16:57 Speaker 2

The opposition still exists, but their proponents still exist.

00:17:01 Speaker 2

Someday that.

00:17:02 Speaker 2

Will be resolved.

00:17:04 Speaker 2

Now I know that.

00:17:05 Speaker 2

The You are a man of considerable modesty, and it's something like, well, you know, saying that the wild horses can't pull some things out of you.

00:17:15 Speaker 2

But I've looked around, you know, through the files and the records, and I happen to know that in 1959 to be precise, May 16th.

00:17:22 Speaker 2

Of 1959.

00:17:24 Speaker 2

You were chosen.

00:17:25 Speaker 2

As dentist of the century by the Houston District Dental Association, in our observation are the 100th anniversary of the American Dental Association. That must have been a very fulfilling, rewarding gesture on their part as far as.

00:17:39 Speaker 2

You're concerned, darling.

00:17:42 Speaker 3

Oh yes, because I that.

00:17:47 Speaker 3

The social has made by a local double group and be chosen by that person by their necessarily a distinguished.

00:17:57 Speaker 3

Second round to commemorate the 100th anniversary of dentistry from the first College in Baltimore, MD.

00:18:07 Speaker 3

For the present day, facilities at dentistry hires for education.

00:18:13 Speaker 2

An unusual honor, I'm sure, and very personally satisfying to you because you were selected really by former students because most of them medicine Houston at that time certainly were former students of yours.

00:18:21 Speaker 3

Yes, that's right.

00:18:24 Speaker 2

In connection with that, I came across this document. It's called Senate resolution #12. It's signed by Mr Ben Ramsey.

00:18:33 Speaker 2

President of the Senate as a Texas State legislature.

00:18:37 Speaker 2

And also secretary of the Senate, Mr Charles Schnabel, and it's dated May 21, 1959. It has several elements of recognition here.

00:18:48 Speaker 2

But at the.

00:18:49 Speaker 2

End they point out that you've been a selected man of the year.

00:18:54 Speaker 2

So on and so forth and.

00:18:56 Speaker 2

Compliment you on your many contributions to your community and to your state.

00:19:01 Speaker 2

And it's resolved.

00:19:02 Speaker 2

Run by the Senate of the State of Texas at this body, drawing with the hundreds of other friends and admirers of Doctor Frederick C Elliott and expressing appreciation to him for his years of civic and professional service.

00:19:14 Speaker 2

And in congratulating Dr Elliott upon his latest award as dentist of the century, and be it further resolved that a copy of this resolution be sent to Doctor.

00:19:23 Speaker 2

As a token of our.

00:19:24 Speaker 2

Esteem and good wishes.

00:19:26 Speaker 2

I think that's very nice and it's very.

00:19:27 Speaker 2

Pretty has a nice see a lot of.

00:19:32 Speaker 2

Now there was another.

00:19:33 Speaker 2

Award with which I'm not too familiar.

00:19:36 Speaker 2

In 1960.

00:19:38 Speaker 2

Were given a gold medal award by the Pierre Fouchard Academy, who was Pierre Fouchard.

00:19:46 Speaker 3

A peer for showers pair status that he is regarded as the father and mother of modern dentistry.

00:19:54 Speaker 3

I'm sure you're aware that before that time he called brothers.

00:20:00 Speaker 3

The best thing?

00:20:02 Speaker 3

Is that a surgery was done by Barbara?

00:20:04 Speaker 3

The fair share listed about that run put the hands of people who she felt were better educated, and for that reason, this call that he wrote the.

00:20:13 Speaker 3

First textbook by the.

00:20:14 Speaker 3

Way in dentistry, and he's been called the father of Douglas.

00:20:18 Speaker 2

Oh, good.

00:20:20 Speaker 2

Now let's move along.

00:20:21 Speaker 2

I I have here.

00:20:23 Speaker 2

A photograph. Doctor Elliot that.

00:20:27 Speaker 2

Well, you had your before chart here and it's got 1960 on it and says Texas Medical Center report, obviously you sort of believed in audio visual presentations in those days to communicate with your board.

00:20:41 Speaker 2

So also I have here a written document that says the Texas Medical Center Incorporated annual report. This particular one is 1959.

00:20:51 Speaker 2

The reason I bring it forth right now is to run through a list of the institutions included in the back, about which there's considerable information.

00:20:59 Speaker 2

Each case, but to refresh our memories as to.

00:21:03 Speaker 2

What institutions really were here in 1959?

00:21:06 Speaker 2

This Medical Center had come along where, of course, later college.

00:21:10 Speaker 2

Of medicine was here.

00:21:12 Speaker 2

So, Delta Branch, University of Texas Dental branch prisoner when the Texas Institute for Rehabilitation and Research come on the scene.

00:21:22 Speaker 2

This is on the direction, I believe, of Doctor William Spencer.

00:21:25 Speaker 3

Yes, that is an important part of the program today because as you all know that these people are not make makes sense.

00:21:39 Speaker 3

The rest of their life.

00:21:39 Speaker 2

Yes, also, your Houston State psychiatric Institute for training and research is listed here, but was an offshoot of some of the work that you've done before.

00:21:50 Speaker 2

Other men run Texas Women's University College of Nursing.

00:21:53 Speaker 3

Yes, that is a very important that is something without talking about by Mr.

00:21:57 Speaker 3

Jones is a member of our board of trustees.

00:22:01 Speaker 3

And that they have been effective draw that educational versus I felt that it was the best forms of education and therefore versus in the United States.

00:22:11 Speaker 2

The University of Texas MD Anderson Hospital and Tumor Institute was well on its way and thriving, serving the lowest state and others across the nation.

00:22:21 Speaker 2

In many ways, those Graduate School of medicine is still growing strong, and by that time.

00:22:26 Speaker 2

I'm sure that potato is closely associated with it.

00:22:29 Speaker 2

Again, the Houston speech and Hearing Center is mentioned.

00:22:33 Speaker 2

Ultimately, that institution constructed their own building near the rehab building and that's now occupied.

00:22:43 Speaker 3

I brought from the University of Texas.

00:22:48 Speaker 2

Methodist Hospital is here and going strong.

00:22:50 Speaker 2

Another new one that we haven't discussed before, at least Arabia temple crippled Children Clinic.

00:22:56 Speaker 3

That was established course by the shrine, shiners and the remarkable specialist.

00:23:05 Speaker 2

Very beautiful since.

00:23:07 Speaker 3

Then they both said that the children from the other businesses.

00:23:11 Speaker 2

Saint Luke's Episcopo Hospital, Texas children hospital.

00:23:17 Speaker 3

The Institute of.

00:23:18 Speaker 2

A rather unique concept, I think in its day.

00:23:22 Speaker 3

The first line of the United States at a Medical Center.

00:23:25 Speaker 3

Yes, first.

00:23:26 Speaker 3

And of course the purpose of that is to train the ministers so they could take care of patients in hospital better than they had been.

00:23:37 Speaker 2

City County Charity Hospital I think we're still at that time discussing Jefferson Davis Hospital at Benton Hospital is soon to come into being.

00:23:47 Speaker 2

Then finally Hermann hospital.

00:23:50 Speaker 2

Richard grown breasts, yes.

00:23:50 Speaker 3

First, institutional level data center.

00:23:55 Speaker 2

Now, while we're on the subject of institutions that had come into being, these are our marked examples of ideas activities coming to fruition.

00:24:06 Speaker 2

But you and doctor Burtner used before I know had talked about many things, some of which did come to fruition at that time, some later.

00:24:13 Speaker 2

Some never did.

00:24:14 Speaker 2

Let's run through just a short list of them.

00:24:16 Speaker 2

Central clinic.

00:24:19 Speaker 3

Well, that is the idea that we.

00:24:21 Speaker 3

Had this is somewhat like.

00:24:26 Speaker 3

Without ever talking.

00:24:28 Speaker 3

And the central clinic was an idea that another payment foolish because it was thought that was possible.

00:24:35 Speaker 3

We're not sure the purposes as well.

00:24:37 Speaker 3

Well, I think it's worked out that it wouldn't, but it was a good idea at the time.

00:24:42 Speaker 2

Central laundry.

00:24:44 Speaker 3

Yes, faster than thought of this or overhead.

00:24:46 Speaker 3

And Excel just had.

00:24:48 Speaker 3

Ground as a child after each letter has brought him to flourish.

00:24:54 Speaker 2

Uh, geriatrics program.

00:24:57 Speaker 3

It has the geriatric program or not, as mentioned by doctor trucks.

00:25:02 Speaker 3

It was interrupted by Colonel Bates at Mr Freeman, who felt that that ought to be one of the first institution.

00:25:09 Speaker 2

Very high priority.

00:25:11 Speaker 2

We must point out that Mr Freeman and Colonel Bates are still around, very active, very busy and closely connected with this Medical Center central heating.

00:25:22 Speaker 3

Yes, yeah, that was thought out.

00:25:25 Speaker 3

Well, they had the first engineers within the Medical Center and it was felt that it was not feasible.

00:25:30 Speaker 3

The Doctor Eastman has made itself through an arrangement with Sally Power, people who are used.

00:25:37 Speaker 2

Now I know you have talked with a spark on your eye from time to time.

00:25:42 Speaker 2

And also an.

00:25:43 Speaker 2

Air of disappointment about you in connection with the monorail?

00:25:46 Speaker 3

Second one is this Saturday.

00:25:53 Speaker 3

Rather rare.

00:25:55 Speaker 3

Fear that maybe the model or do habitat.

00:25:57 Speaker 3

Brooklyn. They felt that.

00:25:58 Speaker 3

It was.

00:25:59 Speaker 3

It would have been a system.

00:26:00 Speaker 3

That they have shipped.

00:26:01 Speaker 3

All cars out of Medical Center would add centerpiece of parking throughout areas close to the Medical Center without the congestion.

00:26:10 Speaker 3

Of how it all occurs.

00:26:11 Speaker 3

This the Medical Center, but the.

00:26:15 Speaker 3

The primary thought was quite expensive.

00:26:18 Speaker 3

And it turned out that it's just not as expensive as just wanted like garages that we have today.

00:26:22 Speaker 2

Yes, well, the situation is that we do not have a monorail, but we do have some modern garages coming along with great capacity.

00:26:31 Speaker 2

And as I understand it, as new institutions or as new structures are erected in the Medical Center by various institutions, they will incorporate parking facilities.

00:26:40 Speaker 2

Giving them an attempt to alleviate that situation.

00:26:44 Speaker 2

Now we're ending the.

00:26:46 Speaker 2

Renewing the end of this particular segment of our discussion, Doctor Elliot and also we're approaching the year of 1960.

00:26:53 Speaker 2

So I believe you elected to become less.

00:26:56 Speaker 2

Active in the Texas Medical Center.

00:27:01 Speaker 3

Well, we had reached a place where I.

00:27:03 Speaker 3

Was living there.

00:27:04 Speaker 3

Alone, and I felt the time that would be good if we could have some person who is well informed and business operations so much better than I, and that I could devote my energies to.

00:27:19 Speaker 3

That I have been doing for so many.

00:27:20 Speaker 3

Years, not just to develop.

00:27:23 Speaker 3

Doctor issued was true last month after consideration of any candidate.

00:27:28 Speaker 3

They didn't care, as you all know, the.

00:27:30 Speaker 3

Proper selection, he.

00:27:32 Speaker 3

Probably only the.

00:27:33 Speaker 3

Best, best Outstanding Medical Center directors that we have United States.

00:27:37 Speaker 2

Jess she's had unique ideas within the life is and the Medical Center has come a long way since he arrived in 1962 was.

00:27:45 Speaker 3

It yes. It came and took office in August 15th, 1962.

00:27:51 Speaker 2

Now, looking back from that point in time, if you like Doctor Elliot.

00:27:55 Speaker 2

The way back when, this whole thing was just a dream, when Doctor Burton and others talked about it.

00:28:03 Speaker 2

Now this is 1973, I'd like to.

00:28:06 Speaker 2

Know and ask you.

00:28:09 Speaker 2

What is the Texas Medical Center?

00:28:11 Speaker 2

What does?

00:28:12 Speaker 2

It mean to use.

00:28:15 Speaker 3

Well, of course.

00:28:17 Speaker 3

You go right back and the first time that we talked about a Medical Center, we mentioned it as a level.

00:28:23 Speaker 3

Set up for health education.

00:28:26 Speaker 3

Under some of the things that come.

00:28:28 Speaker 3

Into fear that just.

00:28:29 Speaker 3

Answers that question we were talking about.

00:28:33 Speaker 3

That would be before the total thought surrounding the person.

00:28:39 Speaker 3

That was the terrible type of care which is took into account the spiritual self, his level cell phone system.

00:28:48 Speaker 3

So we felt that we had them develop institutions that looked through.

00:28:52 Speaker 3

Teaching, research and service of all of those areas.

00:28:57 Speaker 2

But I believe you have always being an educator by nature, and I think first love, really.

00:29:02 Speaker 2

You've always felt that the emphasis should be on education.

00:29:06 Speaker 2

As far as I've triangles concern that research supports that and that the patient service supports that.

00:29:12 Speaker 2

I think we do in the Texas Medical Center, not quite perhaps in the mixture.

00:29:17 Speaker 2

That you would like to see it.

00:29:19 Speaker 2

Not ideal or perhaps, but certainly effective.

00:29:22 Speaker 2

We do have that triangular sort of program going on today much as you and doctor Burtner and others dreamed about it.

00:29:30 Speaker 2

Our time is drawing short for this particular segment.

00:29:33 Speaker 2

I would like to invite our viewers to join us once again.

00:29:36 Speaker 2

In part 5.

00:29:38 Speaker 2

In which we'll explore the years 1963 to the present and what those years have meant to doctor Frederick C Elliott. Thank you again, Doctor Elliott. See you soon.

00:29:46 Speaker 1

That's sex.
